

# Looking up at the night sky

~ St. Maarten's Backyard Astronomy for November 18 & 19 ~

**Sun rises at 6:19am**  
**Sun sets at 5:34pm**

**Moon phase: New Moon, virtually absent**

November is a wonderful is composed of eight of

colour.

Betelgeuse, at Orion's shoulder, marks the centre of the Winter Circle.

sky will be just peeking over the horizon, directly below the horizon, directly below Rigel. This is the Dog Star, Sirius, in the constellation of Canis Major, or "big dog." Sirius is white in colour.

Taking care of the animals in the community

Good feeling lunch ready!
